

# THE TOP TEN COUNTDOWN

9 Handguns and 1 Shotgun to Choose From

The Best of the Best!

# Drumroll..... Here They Are!

These are the top ten firearms we chose for home protection. They have been chosen on the basis of easiest trigger pull, lightest weight, good capacity of rounds held, easiest slide racking (pistols), best reputation for repairs needed, Mfr. customer service, caliber, and cost. They are NOT listed in any order of preference. That's for YOU to choose, like from a box of chocolates!

- #1 Smith & Wesson M&P Shield EZ, 9mm**
- #2 IWI Masada 9mm**
- #3 Springfield XD Mod.2, 4" service model, 9mm**
- #4 Bersa Thunder 380 ACP.**
- #5 Mossberg Maverick, 20 Gauge Pump-Action Shotgun**
- #6 Sig. P238 Select Micro-compact 9mm kurtz (.380 ACP),**
- #7 Springfield Armory 911. 9MM**
- #8 Glock 19, Compact, 9mm**
- #9 Ruger SP101 Revolver. .38 spl or 9mm with moon clip, 5 rounds**
- #10 Colt Cobra Revolver, .38 Spl +P, 6 rounds**

**#1 Smith & Wesson M&P Shield EZ,  
9mm. 8+1 rds, “easy to rack slide,  
easy to load magazine.”  
\$479 MSRP**

The new M&P9 Shield M2.0™ EZ pistol features an 8+1 round capacity and a 3.675” barrel. It ships with two 8 round magazines that feature a load assist tab for quick, easy loading, and an orange follower to signal empty. It also has an equipment rail to accommodate accessories. The pistol also features an optimal 18-degree grip angle for a natural point of aim, white-dot front and adjustable white-dot rear sights, and a light, crisp hammer-fired trigger. The barrel has a lower bore axis which helps reduce the muzzle rise when you shoot. It’s also reliable and consistent. If you’re a person with “reduced grip strength” this is a no-brainer. It’s definitely easy on the hands. S&W did everything as right as possible in a compact handgun.

## FEATURES

- **Caliber:** 9mm
- **Magazine Capacity:** 8+1
- **Weight:** 23.2 oz
- **Barrel Length:** 3.675"

## #2 IWI Masada 9mm, MSRP \$624

- **IWI Masada** 9mm polymer framed striker-fired pistol was developed in order to provide an advanced solution to the modern battlefield requirements. The MASADA features a low profile barrel for reduced perceived recoil. Back-straps coupled with the deep beavertail enabling it to fit a wide variety of hand sizes.
- MASADA utilizes a modular serialized high grade steel trigger mechanism housing that can be easily removed, allowing simple and easy disassembly and maintenance.
- MASADA's trigger is designed to enhance the shooter's accuracy and safety. The average pull is from 5.5 to 7 Lb. with a clean and crisp break and a positive reset. Featuring a built-in trigger safety, the pistol will not fire unless the trigger is pulled. The shooter's security is further enhanced during cleaning and maintenance as there is no need to pull the trigger in order to field strip the weapon.

## FEATURES

- **Caliber:** 9mm
- **Magazine Capacity:** 10+1 or 17+1
- **Weight:** 22.9 oz
- **Barrel Length:** 4.1"
- **Trigger Pull:** 6 lb.
- **Slide Operation:**

### #3 Springfield XD Mod.2, 4" service model, 9mm. \$559 MSRP

**Springfield XD Mod.2, 4" service model, 9mm subcompact** (great gripping slide serrations) Featuring high visibility low-profile sights and a slim-contour frame, it's a feature-packed full sized double-stack pistol. At less than a quarter inch wider than the industry's slimmest single stack polymer frame pistols, the Mod.2<sup>®</sup> offers 16+1 rounds of 9mm. The noticeably slim profile make it a pistol that offers excellent ergonomics and serious firepower in a surprisingly concealable full sized handgun. It is loaded with safety features. The striker status indicator, loaded chamber indicator, grip-safety, internal firing pin block, and the trigger system all work to make it a safe and easy to use pistol. GripZone<sup>®</sup> ergonomics optimize contact between the human hand and the frame of the pistol with a deep beavertail.

## #4 Bersa Thunder 380 ACP. 5.5 lb. pull single stack, MSRP \$324. Inexpensive, but a long time favorite.

- The Thunder .380, Bersa's best selling model, offers numerous valued features – accuracy, reliability and versatility in a lightweight, compact design. The Thunder .380 has earned a worldwide reputation of quality, and is truly one of the best performance-for-price buys on the market. It's alloy metal small-frame and ideal capacity combines with Bersa's time-tested reliability and accuracy to make the Thunder .380 an excellent choice for personal protection. An external thumb safety, de-cocking lever, extended beavertail, and magazine finger rest give it points for safety and grip assurance. If cost wasn't the only factor, it would still sell based on how it feels natural to the hand and shoots reliably with an easy-to-squeeze trigger.

## FEATURES

- **Caliber:** .380 ACP
- **Magazine Capacity:** 8+1 or 7+1
- **Weight:** 20.0 oz
- **Barrel Length:** 3.5"

# Bersa Thunder 380 ACP Single Stack 7+1

*DA = double action,  
SA = single action*

# #5 Mossberg 88 Cruiser based, 20 Gauge Pump-Action Shotgun: *Palo Duro & Palo Verde.*

- The features of a perfect shotgun for home protection were difficult to obtain in an off-the-shelf weapon, so we started with the Mossberg riot gun, then added a stock and forearm with more “civilian” attributes. The Mossberg 88 Cruiser is a tactical Police model with a pistol grip instead of a stock. We made a few changes to make it friendlier to handle, renaming it “**Palo Duro**” in black, and “**Palo Verde**” in green (good Texas names). The barrel is just ½” longer than the legal short limit (18” for sawed-off), and it will hold 6 rounds total. If all 6 were used, it could really tear up your house.
- This gun has a **Hogue** synthetic stock and forearm, and a thick recoil pad. The receiver is machined from a solid block of steel. The main features of the **Palo Duro** and **Palo Verde** being more compact, not only make it easier to store, but very easy to handle when fast action is required. It also has a rail attached for a flashlight mount of your choice.
- A couple features with this gun (compared to its competitors), includes an easy to depress action lock lever. The 12” LOP (or Length Of Pull) choice allows those folks with short arms or necks to handle the overhung **weight** of the barrel and loaded tube magazine. For taller folks, a 14” LOP stock can be ordered. And, it is a full pound lighter than other Mfr. models.
- This shotgun has dual extractors, twin action bars, and an anti-jam shell elevator. Reliable!
- No other brands out there have the features that this custom built workhorse has. The base Cruiser model is used by a majority of police depts. in the US, because of its reliability. Plus, you can still buy the double-aught buckshot ammo at your favorite discount store.

# Mossberg 20 Gage Pump- Action Shotgun (Modified) to *Pala Duro & Pala Verde*

## FEATURES

- **Caliber:** 20 gage
- **Magazine Capacity:** 5 (+1 in chamber)
- **Weight:** 5.5 #
- **Barrel Length:** 18.5"
- **Trigger Pull:** ? lb.
- **Pump Operation:** smooth
- **Barrel and Action Material:** Steel
- **Stock Material:** Hogue Polymer
- **Forearm:** Hogue Polymer
- **Overall Length:** 28"
- **Sights:** Dual Bead

## BENEFITS

- Optimum load for least recoil
- Longest magazine tube available for 18.5" barrel
- Light weight
- only ½" longer than legal limit for "sawed-off"
- Easy
- Easy to get the hang of
- machined from a solid block with gloss black finish
- Corrosion-proof, tough (black or green)
- Good texture (black or green)
- Full size with shortest barrel
- Standard for shotguns

- **Manual Safety:**
- **Loaded Chamber Indicator (LCI)**
- **Action:** Pump
- **Accessory Mounting Rail:** included
- **LOP:** 12 to 14"
- **Ambidextrous Controls:** one
- **Warranty:**

Ambidextrous Cross Bolt button

**Not Applicable**

Easy to get the hang of

**Convenient for attaching a flashlight or laser**

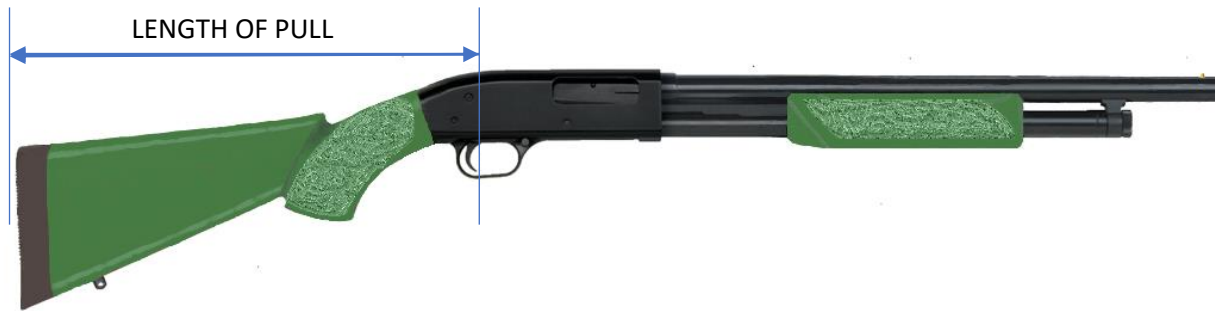

We adjust the length to fit you!

Manual Safety

10 year against defects

# Shotgun Length of Pull (LOP) - What is It? Why Does It Matter?

Many long guns, shotguns and rifles, come in one size fits all (which of course, they don't). This typically requires the butt end of the stock to be added-on to with spacers, or cut back. The LOP is the distance between the end of the buttstock to the trigger. It does not relate directly to the

length of one's arm, but rather to a combination of height, fat or muscle volume at the shoulder, and length of one's neck. For hunters, adding in the thickness of your outerwear also matters.

- The result is: if the distance from your nose to the base joint of your thumb on the stock is **between 1-2"**, it's just right. Too long (from 14.5-16") and you can't hold it up because it's muzzle heavy and not balanced. Too short (11.5-13") and the recoil kick can injure your face.
- This is modified by your height: a shorter person or a youth will have shorter arms and a shorter neck, where the 12" LOP stock would fit just right. That same teen growing up will need a new stock or extensions to fit.
- To measure, the buttstock MUST be very firmly planted in the shoulder to shoot.
- *When you order a shotgun from us, we will try to fit the stock to you, if you give us some basic measurements and maybe a full height picture of yourself. We will work with you!*

## #6 Sig. P238 SELECT MICRO-COMPACT 9mm kurtz (.380), sweet to handle. \$715 MSRP. Single stack magazine.

- SIG SAUER engineers designed the P238 Select as a smart looking, small handgun built with the same accuracy and reliability as large frame SIG SAUER pistols. With an overall length of just 5.5 inches a height of 3.96 inches, and weighing just under a pound, the P238 Select is the ultimate firepower in an all metal frame concealed pistol.

Additionally, the contrast sights or SIGLITE

Night Sights are removable and adjustable for

windage. The sear and trigger return spring are redesigned to prevent spring over-ride of the ejector

during assembly. The P238 Select also comes with custom grips.

In spite of the higher trigger pull, this pistol has consistently been rated the highest in testing by women and men alike.

## FEATURES

- **Caliber:** .380 ACP
- **Magazine Capacity:** 7+1
- **Weight:** 15.2 oz
- **Barrel Length:** 2.7"

**Sig. P238 SELECT  
MICRO-COMPACT  
9mm kurtz (.380)**

## #7 Springfield Armory 911, 9 mm Nitride. 5# pull, easy rack. \$649.00 MSRP.

- **Very nice to handle.**
- When you choose to carry concealed, you need a pistol that's going to seamlessly blend into your daily routine without unnecessary size, weight or inconvenience. SA's newest pistol for 2019, the 911 9mm brings you all of the ease and intuitive features that your reliable standby should have. Unobtrusive and accurate, it is a formidable defensive tool.

The 911 platform provides superior handling characteristics that are unique among small pistols in its category. The 911 9mm gives the shooter the convenience of a small frame but with the familiar feel of the much larger military 1911. The short grip allows the fingers to support the frame from under the magazine. An optional 7+1 capacity magazine with extended fingerwell is also available.

## FEATURES

- **Caliber:** 9mm
- **Magazine Capacity:** 6+1
- **Weight:** 15.3 oz
- **Barrel Length:** 3.00"
- **Trigger Pull:** 5 lb.
- **Slide Operation:**
- **Barrel and Slide Material:** 416 Stainless
- **Frame Material:** 7075 T6 AL
- **Grip:** Hogue Polymer

**Springfield  
Armory 911,  
9 mm, Nitride**

## #8 Glock 19, compact, 9mm \$648 MSRP

- **IT'S A GLOCK.** The original polymer-framed pistol, nearly indestructible, favorite of police departments everywhere. You can shoot a myriad of different brands of ammo and different types, like hollow points and full metal jacket, & with different bullet weights, with no issues at all. Advertised to work flawlessly every time. Easy to clean, easy to disassemble and reassemble, *it's a classic*. The only sore point is that little serrated slide lock latch just above

the trigger on the frame: it's hard to move to unlock the slide for cleaning. It takes a technique and strong fingers. Other than that, it's a great choice. The finish on the barrel and slide is easy to clean, but it has been known to rub off. The tolerances are a little tighter to maintain accuracy. The polymer grip feels just right. This gun is very reliable and won't disappoint.

- The Glock 43 is a sub-compact version of the model 19, but the 19 has better ratings, and other micro-compact firearms are rated higher than the model 43.

## FEATURES

- **Caliber:** 9mm
- **Magazine Capacity:** 15 +1?
- **Weight:** 23.6 oz
- **Barrel Length:** 4.02"
- **Trigger Pull:** 6.3 lb.
- **Slide Operation:**

compact,  
9mm**

## #9 Ruger SP101 5-shot revolver, in .38 spl, or 9mm with moon clip. \$719 MSRP

- Revolvers come in several flavors: expensive, hard to shoot, junk, and “just right.” This revolver design is a clever twist on an old favorite. It can shoot ammo intended for a semi-auto handgun (9mm) in a revolver cylinder rather than a magazine. This is possible by using a thin, small metal ring, called a moon clip, which holds the shells a similar way that a plastic ring-top for a six-pack of aluminum cans works. After use, the empty shells are taken out ring and all, then stripped off the ring to reload. You can pre-load as many clips as you like for easy and quick cylinder reloading.
- Most revolvers have a tough trigger pull in excess of 12#, and the published weight of pull on this one is 14#. However, the units we have tested are closer to 10#, and are easy to use. It is considered by many to have one of the lighter triggers of the field of revolvers.
- Rugers are some of the most indestructible handguns out there. They are built with a comparatively massive frame, and with a no-nonsense polymer grip, they can easily become a favorite for anyone of any size or strength. It’s the Goldilocks of “just right.” Unfortunately they carry the price tag with it.
- The Ruger SP-101 also comes in a standard revolver caliber, the .38 special, which does not need moon clips.

## FEATURES

- **Caliber:** 9mm or .38 Spl
- **Cylinder Capacity:** 5
- **Weight:** 25.0 oz
- **Barrel Length:** 2.25"
- **Trigger Pull:** 14 # DA, 5# SA
- **Barrel Material:** Stainless stl.
- **Frame Material:** Stainless stl.
- **Grip:** Polymer
- **Overall Length:** 7.2"
- **Sights:** std. ramp
- **Integral Safety:** (no manual safety)
- **Height:** 4.625", **Thickness:** 1.350" at cyl.
- **Action:** DA/SA hammer fired firing pin
- **Accessory Mounting Rail:** none
- **Ambidextrous Controls:** none
- **Warranty:**
- **A moon clip (ammo installer) "moonier/de-mooner" device will be included with the sale of a 9mm. We make these at Psalm 18:32 GunWorks just for these 9mm guns. It's easy to use, and the loaded clips work like a pre-loaded magazine, aiding in the ejection of spent cartridges.**

## BENEFITS

- Optimum loads for least recoil
- 9mm with moon clip, .38 Spl no clip req'd.
- Easy to lift and hold steady
- Improved accuracy
- Not as hard as it looks.
- Built like a tank, typical Ruger design
- Corrosion-proof, tough
- Grip texture optimized to size and recoil
- Compact size**
- Easy sight picture
- Transfer bar and triple locking cylinder at front, rear, and bottom for positive alignment
- Good for all hands
- Reliable design
- RH cylinder release only
- Ltd. Parts only. No problem.

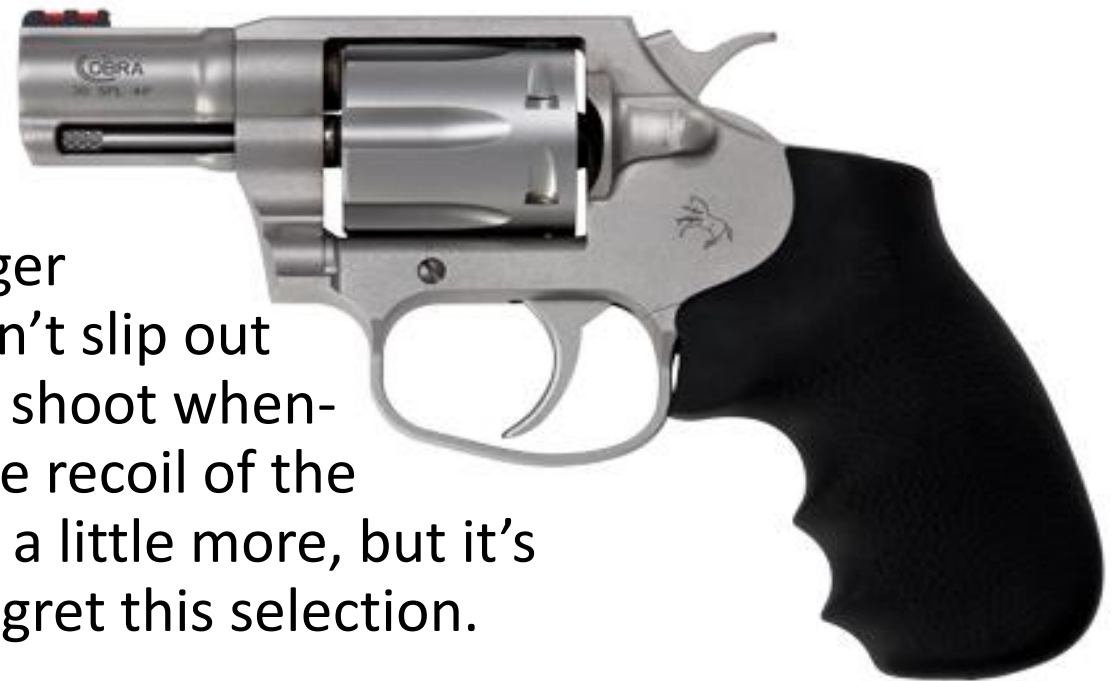

**Ruger SP101 .38  
spl revolver, 5-  
shot, or 9mm  
with moon clip.**

*DA = double action,  
SA = single action*

# #10 Colt Cobra .38 Special +P, 2" barrel stainless finish, 6 rounds, fiber optic sight with rubber grip and hard case. \$890 MSRP

The Cobra .38 Spl. is a comeback from the WWII Commander model of revolver. It joins the Colt "Snake" line of revolvers with superior handling. This firearm was designed to meet the needs of new shooters and seasoned professionals alike. It's enjoyable to shoot, easy to carry, and will take the additional power of +P rated ammunition. (Note: +P is for *Punishment*. This gun will NOT take .357 magnum ammo; that would be *REAL punishment*.) Note the finger grooves on the grip: it is well balanced and won't slip out of your hand. Simple features make it ready to shoot whenever you need it. The added weight absorbs the recoil of the 38 Spl. load. Fine craftsmanship means it costs a little more, but it's the top choice of revolver design. You won't regret this selection.

## FEATURES

- **Caliber:** .38 Spl + P
- **Cylinder Capacity:** 6
- **Weight:** 25.0 oz
- **Barrel Length:** 2.00"
- **Trigger Pull:** 7-9 # DA, 3.5# SA
- **Hammer Pull:** Easy-Medium
- **Barrel Material:** Stainless stl.
- **Frame Material:** Stainless stl.
- **Grip:** Hogue Polymer
- **Overall Length:** 7.25"
- **Sights:** fiber optic and trench
- **Integral Safety:** included
- **Height:** 4.90", **Thickness:** 1.40" at cyl.
- **Action:** DA/SA hammer fired firing pin
- **Accessory Mounting Rail:** none
- **Ambidextrous Controls:** none
- **Warranty:**

## BENEFITS

Lots of power without excessive recoil  
The classic 6-shooter  
Good balance against recoil  
All you need for close combat
